Identification of drug substance: .Liquid chromatography .Thin-layer chromatography	The ratio of the retention times of the drug substance peak from the test solution and from the reference solution must be between 0.97 and 1.03. Main spot identical in position, colour and size for test and reference	The ratio of the retention times of the drug substance peak from the test solution and from the reference solution must be between 0.97 and 1.03.
